Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,4-7, 9,11,12, and 14-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Abel. Abel shows the use of a child seat linking device comprising two movable linking components (20,21) between an idle and working position, return means (22) which returns the linking components to the idle position and a tension indication means (30) which uses a needle that's rotatable. The length of a strap may be adjusted by the tension applied to the strap (see Figs. 6. and 8). Abel discloses that one component is secured to the child seat via the strap (16) at its base and that the device may be secured within a vehicle. Abel further discloses that the strap may be adjusted (for tensioning) by a bracket (see col. 6 lines 55-64), which has two parallel housings (see Fig. 8) and the components may comprise electrical devices.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3636

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8,10 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abel.

Abel discloses that the return means may comprise a spring-loaded cam, (see col. 5 line 3) but fails to teach the use of a spring as being parallel to the axis of movement or torsional. It would have been an obvious matter of design choice to one of ordinary skill in the art at the time of the invention to use a spring parallel to the axis of movement or torsional since applicant has disclosed that a spring parallel to the axis of movement or torsional solves any stated problem.

Allowable Subject Matter

Claims 2-3 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 6,024,408 and 5,979,982 show features of the claimed invention.
